Software Development Internships

The UNL Office of Research and Economic Development is seeking a Software Development Intern to help with a variety of web-related software development responsibilities. We need a responsible individual with solid communication and organizational skills who can follow directions and complete tasks accurately and on deadline. The Intern will perform assignments designed to develop professional software using standard techniques, procedures, and practices. The Intern will be part of a team, with coaching and direction provided by his/her direct supervisor.

As a member of the team you will:

- Assist engineers with process enhancements
- Assist with quality assurance activities and testing scenarios
- Write beautiful code in PHP
- Work on complex problems and see your code deployed and used by real customers
- Participate in our agile planning and process
- Rapidly fix bugs and solve problems
- Engage in ongoing technical development and growth

Qualifications:

- presently pursuing a career in computer science or related discipline
- Knowledge of software/web development – PHP, jQuery, HTML, CSS, JSON a plus
- Understanding of Object-Oriented software development
- Familiar with SQL databases
- Excellent listening and writing skills
- Excellent communication skills
- Ability to work independently and in a team setting
- Organized and detail oriented with excellent initiative and follow-up skills

Successful candidate will work 15 - 20 hours per week during the school year, with potential for 40 hours per week in the summer. We will support candidate on internship credits if desired. Schedule to be determined once hired. Pay is $15/hour. For more information, contact Shane Kimbrough at (402) 472-3504 or skimbrough2@unl.edu. Please supply:

- Class schedule for coming semester and list of times available to work
- Short resume with list of qualifications and experience and relevant work examples
